

# Symbiotic Relationship between Data and Technology (Webinar)

August 7, 2020 ☐ 10:00am - 11:00am

The link between data and technology within Risk departments is an ever growing and evolving relationship. As data becomes deeper, wider and more complex, so must the technology solutions to handle and capitalize on this complexity. Our “Big Data” world not only allows for higher accuracy and more insight, it actually requires it to function properly. However, without growth in lock step, benefits made to only one side of the equation cannot provide the true full value to an end user.

When evaluating complete solutions, the relationship between data and technology does not need to be a zero-sum proposition.

### Who Should Attend:

Technology, COOs, Risk Officers, Security Officers

### Webinar Speaker:

**Charlie Heidlage** is the Partnership Manager for the CLEAR suite of solutions with Thomson Reuters. He is responsible for the strategy and oversight of all technical partners within the Corporate Investigative arm of TR. He is based out of Washington, DC where he lives with his wife and dog, Henry. Prior to joining Thomson Reuters, Charlie worked with FinScan for six and a half years, where he was responsible for driving partnership opportunities and building cross disciplinary collaboration. Over the years, Charlie has developed an expertise in Financial Compliance software and has experience working closely with clients solving complex problems in creative ways.
