March 17, 2017: Opening Accounts for Third Party Payment Processors

Third party payment processors (TPPPs) are high risk customers and need extra documentation, information and action during the account relationship. Do you have a convenience store taking payments for the utility company? Or maybe you have a homeowner's association taking payments for another party. If so, you have a high risk customer and must follow BSA guidance in mitigating this risk. During this program we will review types of TPPPs and all the various supervisory guidance to help you develop a risk assessment and action plan to bank these high risk accounts. Understand the nine key points to mitigate risk of banking third party payment processors. Know Your Customer's Customer (KYCC) is today's cry from the examiners. If you bank customers who process payments for third parties you may have both BSA and OFAC risk. **Session topics include:** Defining and identify TPPPs at new accounts; Requesting paperwork and documentation up front may save you time and customer frustration; Discovering TPPPs during the account relationship; Bringing on-board high risk customers and the on-going work; What regulators say about TPPPs in supervisory guidance; (1) Develop policy, procedures and processes for opening and closing TPPPs. Participants will receive: A supplement with all the key supervisory guidances at your fingertips. (2) An Action Plan to help you open, document, monitor and if necessary close these TPPP accounts. (3) Risk Assessment tool to help you risk assess these particular customers.

June 9, 2017: How to Audit BSA

As part of the scoping and planning process, examiners should obtain and evaluate the supporting documents of the independent testing (audit) of the bank's BSA/AML compliance program. The federal banking agencies' reference to "audit" does not confer an expectation that the required independent testing must be performed by a specifically designated auditor, whether internal or external. However, the person performing the independent testing must not be involved in any part of the bank's BSA/AML compliance program (for example, developing policies and procedures or conducting training). Audit findings should be reported directly to the board of directors or a designated board committee composed primarily of, or completely of, outside directors. The scope and quality of the audit may provide examiners with a sense of particular risks in the bank, how these risks are being managed and controlled, and the status of compliance with the BSA. The independent testing scope and work papers can assist examiners in understanding the audit coverage and the quality and quantity of transaction testing. This knowledge assists the examiner in determining the examination scope, identifying areas requiring greater (or lesser) scrutiny, and identifying when expanded examination procedures may be necessary. **Session topics include:** How to use the exam manual to complete a good audit; Reviewing and analyzing your institution based on our audit worksheet; What to do with audit findings; Who should do the audit and why; Developing a good audit process; What you have to cover during the audit. Participants will receive an 100+ page audit worksheet.

September 8, 2017: Writing a SAR Narrative: 24 points to Cover

The narrative section of the report is critical to understanding the nature and circumstances of the suspicious activity. The care with which the narrative is completed may determine whether the described activity and its possible criminal nature are clearly understood by investigators. Filers must provide a clear, complete, and concise description of the activity, including what was unusual or irregular that caused suspicion. This description should encompass the data provided in Parts I through III, but should include any other information necessary to explain the nature and circumstances of the suspicious activity. Filers should provide any information the filers believe necessary to better enable investigators to understand the reported suspicious activity. Narratives must be completed in English. This webinar will cover the who, what, where and why of the crime. It will also cover how to write a narrative to support what law enforcement needs to know and how to get them that information. Concise, clear and detailed narratives are the main focus of the content with every bit of information about accounts, banks and transactions involved. **Session topics include:** A review of the 24 points in the instructions; What to do on new SARs and what to do on continuous SAR; How to count range of activities; Timing of SAR filings; What types of information are helpful to law enforcement; Convictions resulting from SAR filings. Participants will receive 24 Point Checklist and SAR Handbook.
